

The Complete Online Booking Management System for Courses and Events

Product sheet

Our comprehensive solution is designed to enable local authorities to manage bookings for multi person courses and events completely online. Easy to use by both staff and members of the public, our system is worry-free. It is suitable for booking a wide variety of courses and events - from day-to-day meetings and functions to those needing specific workflows, providing everything to ensure things go smoothly.

We have developed this system in conjunction with local authorities. It enables contact centre, administrative and front line staff, trusted third parties and members of the public to successfully arrange courses and events.

The Zipporah system gives you

- An easy-to-create, customisable product using state-of-the-art technology
 - You can create courses, events and dates, as needed
 - You can apply differing charges, rates and concessions, as required
- In-built system intelligence incorporating a range of useful features
 - There is a booking system for events with multiple attendees
 - You can create waiting lists and allocate places from them
 - You can identify course pre-requisites and authenticate training requirements
- Easy full integration with existing systems
 - Our innovative technology includes unity with your existing payment systems
- Comprehensive reporting
 - Our system includes a fully integrated, automated suite of reports, giving you all the statistical information you need to report on bookings
- Worry-free administrative functions
 - The system provides course attendance lists
 - It can also produce certificates

We work closely with you, discussing your council's specific requirements so you get exactly the system you need and one which will work for you. We guarantee our system will streamline and enhance the way in which your courses and events are run, thus improving the service you offer the public. Our solution gives you an easy-to-use, ready-to-go bookings' management service designed to improve event efficiency.
